

Case Study Mantena

Virtual meetings reduces traveling
and increases efficiency

“We chose a cloud solution with personal Cloud Rooms because of the need for flexibility and time efficiency. The employees in Mantena have appreciated the virtual meeting rooms instead of traveling between all our locations. The software is intuitive and easy to use and works very well.”

Per Christian Stensgård

IT consultant – Mantena AS

Case Study

Mantena

Company:
Mantena AS

Company Size:
1000 employees

Industry:
Maintenance / Railroad sector

About the company:
Mantena is a nordic supplier of maintenance services within the railroad sector. The company is owned by the Norwegian Department of communications.

Challenge

Mantena have workshops in 15 locations in Norway and Sweden, in addition to the main offices in Oslo and Helsingborg. This has meant a lot of time consuming and expensive traveling. Especially for all the engineers in the company. Mantena identified the need of a flexible and user friendly cloud software that could replace physical meetings and facilitate good, efficient virtual meetings.

Solution

With the need for smooth collaboration across all locations, Mantena chose Kinly Cloud. The users have their own personal Cloud Rooms and project groups use common Cloud Rooms, called project rooms. With 350 virtual meeting rooms the employees may host efficient virtual meetings in the cloud. They connect either from PC to PC or from traditional video rooms to a PC.

Result

Per Christian Stensgård is an IT consultant at Mantena. With the cloud solution in place he has identified a reduction in traveling and thus increased efficiency. They have gained

valuable working hours and may spend this time on valuable work, he explains.

The employees may continue their meetings from their pads or cell phone. This represents a big advantage.

- Its great to be able to continue to participate in the meeting, even if you have to get to somewhere else or is traveling. A lot of people appreciates the possibility to connect to a meeting on their way home or from the airport and hotel if you are out travelling, Stensgård says.

When the employees have got to know the virtual meeting rooms and they get used to the software, they mainly prefer cloud meetings.

- Kinly Cloud Rooms have been a natural part of a busy work day for a lot of Mantenas employees. They prefer to meet virtually instead of spending a lot of unnecessary time traveling. If they have the possibility of hosting the meeting online, they always prefer that. For us, the greatest advantage is time saved and increased efficiency, without doubt the greatest advantages, Stensgård concludes.
