

# Service Overview

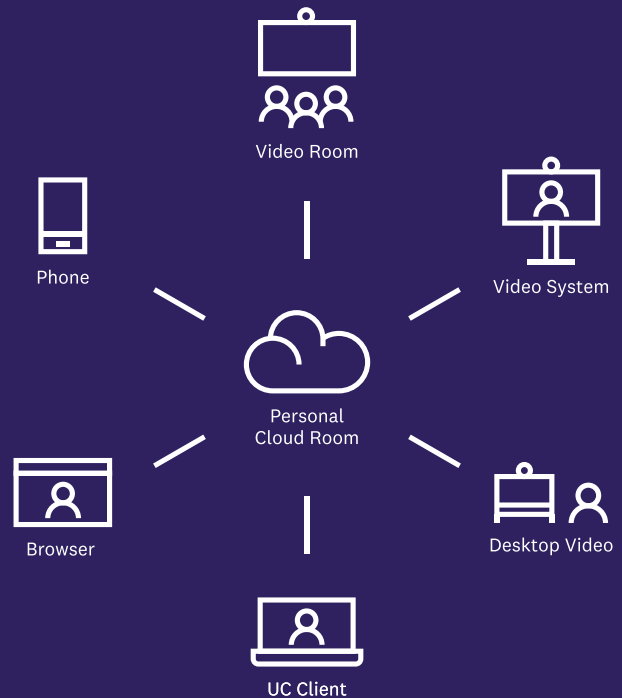

## Kinly Personal CloudRooms

### One place EVERYONE can meet

The need to be remote worker friendly, environmentally responsible, cost conscious combined with the emergence of a younger, highly mobile generation entering the workforce is driving a collaboration technology revolution.

Continual advancements in technology are helping meeting spaces to develop as people centric vehicles for effective collaboration. Flexible design, consistent standards and interoperability amongst platforms are at the core of organisations exploiting this opportunity.

A Kinly Personal CloudRoom is a virtual meeting room where your teams can collaborate with anyone in high quality no matter where they are or what device they use.

#### Enable People

A personal CloudRoom lets users host, share content and collaborate with up to 30 participants. All delivered in leading edge quality.

#### Replicate Workflows

Customisable to meet organisational deployment needs. Manage and optimize, workflows, settings, access and branding.

#### Start On-Time

Simple one click meeting planning via an outlook plug in (everyone gets an option to join) with one button to push to join and start on-time stress-free.

#### Control Meetings

The meeting management interface ensures full control of your meeting. Manage access & audio, stream live and record.

#### Join from Anywhere

The meeting assistant app lets you join meetings the way you prefer, connect a video room, from a pc or even from the phone itself.

#### Encrypted & Secure

Cyber criminals are unpredictable. Kinly deploys robust security and encryption policies for complete peace of mind.

#### Anyone can join

We support Microsoft collaboration tools Google Hangouts, Cisco Webex, Bluejeans and all major web browsers.

#### Scalable & flexible

Kinly Cloud supports the changing needs and capacity requirement of modern organisations with no fuss.
